

Appearance	Sp. Gravity	Solubility in water	Dosage & Feeding	Handling Precaution	Packaging
Viscous liquid	0.90 – 1.20 g/cm <sup>3</sup> (25°C / 77°F)	Dispersible	Like most of our Antifoams, BETAFLOW AF SERIES is effective at very low concentrations, and can be effective at as low as 0.1 ppm. Normal recommendation would be to use as and Antifoam at 0.3 – 3 ppm, and as a defoamer at 3 – 6 ppm. It may be added neat or diluted in a light solvent or dispersed in water. A metering pump should be used for accurate dosing. The product is non-corrosive to dosing equipment. BETAFLOW AF SERIES foam control agent is compatible with common chemicals used in the Oil Production area.	BETAFLOW AF SERIES is essentially innocuous but like all chemicals should be treated with respect. Eye and skin protection should be worn. Prolonged contact should be avoided. If spilt, product may be slippery and could cause accidents. Soak up with absorbent, remove then rinse off.	BETAFLOW AF SERIES is packed in 200 Ltr plastic drum
