

## Runxin F56D1/D2

### Overview

Runxin F56D1/D2 Manual Multiport Filter Valve is a manual filter valve designed for medium to large capacity filtration systems with flow rates up to 10 m<sup>3</sup>/h. Equipped with corrosion-resistant material, this valve is capable of performing three main functions namely service, backwash, and fast rinse without the need to shut down the pump. Suitable for household applications, light industry, swimming pools, and Reverse Osmosis (RO) pretreatment systems, as well as for manganese and iron removal from water.

### Specifications:

- Model: F56D1 / F56D2 (51110 / 51210)
- Jenis Operasi: Manual, dengan handle (logam atau plastik)
- Tipe Mounting: Top mount / side mount
- Inlet/Outlet: 2" F
- Drain: 2" F
- Mounting Base: 4" - 8UN
- Riser Pipe: 1.5" D-GB
- Flow Rate: 10 m<sup>3</sup>/h
- Tekanan Air: 0.15 – 0.6 MPa
- Suhu Air: 5 – 50°C
- Kekeruhan Maks.: < 20 FTU
- Tank yang Kompatibel: 10" – 24" diameter

### Material :

- High-strength engineering plastic
- Metal or plastic
- EPDM
- Plastic threaded base
- High-pressure resistant plastic

### Applications:

- Residential
- Swimming pools
- Light industry
- RO pretreatment
- Agriculture/Irrigation

### Top Features:

- Multi-function use
- Pressure operation
- Rotary handwheel
- Corrosion-resistant
- Supports multiple media
