

LMI GM0240PP1MNN

Overview

Dosing Pump Miltonroy GM0240PP1MNN is a highly efficient Dosing Pump for water treatment and waste water treatment systems that require large capacity with low pressure. Aquatech Indonesia is an importer, distributor and stockist for Milton Roy G series dosing pumps. G Series Metering Pump / Milton Roy Chemical Pump is capable of reaching pressures up to 12 bar (175 Psi) with water flow up to 1180 LPH.

Specifications:

- Tipe Pompa: Mekanik diafragma
- Sumber Daya Listrik:
220V-50Hz satu fase (kontrol langkah otomatis) 220V-50Hz satu fase /
380V-50Hz tiga fase (kontrol frekuensi variabel) 200–240V, 50/60Hz satu fase (kontrol ON/OFF)
- Sinyal Masuk:
4–20mA sinyal analog
Sinyal Keluar:
4–20mA atau 1–5V sinyal analog (untuk pencatatan data atau sistem kontrol)
- Metode Kontrol:
Manual (adjustment langsung),
Otomatis (menggunakan sinyal eksternal 4–20mA)
- Inverter (kontrol frekuensi motor)

Top Features:

- Mechanical Diaphragm Without Contamination
- High Flow Stability
- Sturdy and Durable Design
- Internal Lubrication System
- Flexibility of Flow Regulation
- Dual Head Available

Material :

- Kepala Pompa: PVC (Polivinil Klorida)
PVDF (Polyvinylidene Fluoride)
316SS (Stainless Steel 316)
- Diafragma:
Material fleksibel tahan kimia
- Sistem Katup:
Struktur masuk dan keluar searah, memudahkan pencucian

Applications:

- Municipal and Industrial Wastewater Treatment
- Swimming Pool Water Treatment
- Chemical Industry
- Beverage and Food Industry
- Pulp and Paper Processing
